

LET'S
EXPLORE

Camp Umoja's mission is two fold. It is dedicated to preserving and protecting our natural ecosystems. It is also dedicated to creating a place where youth can be educated about the land and fragile marine environments in the U.S.V.I

Camp Umoja Information

Besides the seaside & Mangrove Lagoon tours students can participate in hiking through the forest, while learning the different types of plants and its uses. Enjoy environmental, technological, and marine life presentations that discuss different ecosystems.

Small groups can take snorkeling or kayaking tours around the surrounding Mandahl bay area. After a day of exploring natural habitats they can relax and play games while experiencing cooking on an open-pit fire using natural wood from the environment.

and the number must be pre ordered.

Location

The campground is located within a 5-minute walk from Mandahl Bay beach and lagoon. Once a sandy beach, now rocky seashore; the beach provides hours of exploration, snorkeling and fun. The lagoon provides a safe place to kayak peacefully, while studying the endangered ecosystems.

Lets learn about our ecosystems to better protect and preserve them!
